

BED LINER CHEVROLET S-10

MODEL **INNER RAIL** + RAIL CAP

Truckliner® bed liners are designed exclusively to protect the box of the truck of the wear by its use. If you are in the business of working hard, a bed liner **Truckliner®** is the ideal work partner, offering protection against dents, scratches, mildew, corrosion and every wear and tear and hit of the day.

Built in resistant materials and in only one piece, no joints.
Highly unlikely to break or get cracked and resistant to daily chemicals such as fuels and acids in batteries.

**CUSTOM MOLDED FOR

Especially shaped for perfect fit

MANUFACTURED UNDER ISO 9001:2015
QUALITY STANDARDS

RESISTANT, STRONG & LONG LASTING

BED LINER CHEVROLET S-10

Inner Rail Model + rail cap

ADVANTAGES

NON-PERFORATION SYSTEM

A non-perforation system is available in most models. The original assembly screw-holes of your vehicle, its fixing clips or fastening hooks (plus a support for the **Truckliner**® adapter between the bed liner and the original fastening holes) are used to fasten the bed liner to the bed of your pick-up thus avoiding perforation of your vehicle.

EASY INSTALLATION

Bed liners **Truckliner**® are very easy to install by means of tiny holes. Instructions are simple and included in the kit. All bed liners can be removed from your vehicle for maintenance or re placement in another vehicle (same model).

NON-SLIP SURFACE / BOARD SLOT

All **Truckliner**® bed liners provide a unique non-slip surface. Our outer rail models have slots, which allow to fasten the cargo with a board. These features help to hold the cargo still, whatever the ground is.

**Leader in the aftermarket for pick-ups
in Latin America.**
